Spider Glazing	Glass Railing
Glass Canopy	Structural Glazing
Aluminium Door & Window	UPVC Door & Window

Toughened / Tempered Glass

Toughened glass is used where strength, thermal resistance and safety are important. Toughened glass is 4-5 times stronger than regular glass. It disintegrates into relatively smaller pieces when broken by pressure that reduces the risk of serious injuries.

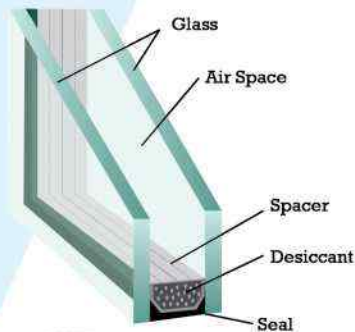

Applications:

- Glass Partition & Door
- Glass Facade
- Glass Railing
- Shower Cubical
- Window with Grill
- Furniture etc.

Insulated Glass

An Insulated Glass unit commonly consists of two panes of glass separated by an aluminium spacer and sealed together with sealants. It helps to reduce power consumption of any premises by preventing heat loss during winters and keeping cool air inside during summer season. It even helps in sound insulation of the place.

Applications:

- Window
- Curtain Wall
- Storefront
- Overhead Glazing
- Railways coach
- Structure Glazing
- Freezer etc.

Security Laminated Glass

Laminated glass is a safety glass that is made by sandwiching PVB sheets between two glasses through heat pressure process in autoclave. It is used when there is a possibility of human impact and security is the main concern. By eliminating the need of grills, it gives us the ability to see more without compromising on the security. It even reduce big amount of heat and sound while eliminating UV radiations.

Applications:

- Window without grill
- Glass Walkway
- Glass Staircase
- Jewellery showroom
- Glass Railing
- Overhead Glazing & Canopy
- Lift Wall
- Swimming pool wall etc.

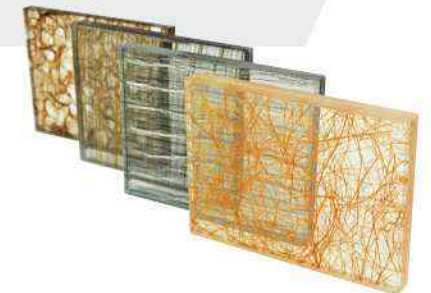

Decorative Laminated Glass

When you want to create something really special, These glasses allows you to incorporate decorative properties into laminated glass by using various materials between two glass layers such as decorative elements, steel mesh, Colour films, visuals, Fabric, etc. This process allows the creation of virtually unlimited aesthetic options, making it the ideal material for custom solutions.

Applications:

- Window
- Partition
- Railing
- Furniture etc.

Bend /Curved Glass

We are one of the few companies in Rajasthan that offers Curved Glass. Curved glass is normal glass curved by a special process. It is a great alternative to the conservative rectangular or flat designs of buildings and partitions.

Applications

- Facade
- Window
- Panoramic lift
- Refrigerator cabinet
- Showcase
- Curtain wall
- Partition

Fusion Glass

Fusion glass is produced by heating glass in high temperatures in the kiln where they become soft and malleable, this causes it to slump down and form the desired shapes or sizes as per the moulds. Our range of Fusion glass applications is in various high end offices, residences and hotels.

Applications:

- Door
- Window
- Partition
- Wall Paneling etc

Digital Printed Glass

The innovation in UV Computerized printing has opened up a universe of new unlimited designs possible on glass. With the help of our advanced printing machine we can print any design, image, pattern or text on any type of glass. These prints are then covered with enamel to protect it from peeling and long durable life.

Applications:

- Partitions
- Furniture
- Cabinet Doors
- Table tops
- Decorative mirrors etc.

Engraved Glass/V-grooved Glass

If you want to add depth and beauty to an otherwise plain glass panel, V-groove glass is a beautiful option in which designs are engraved into the surface of the glasses. Available in various designs and patterns, these can be done on any type of glasses or mirror surface. Such glasses can be used on its own or in combination with acid etching, printing etc.

Applications:

- Windows
- Doors
- Partitions
- Furniture
- Decorative mirrors
- Designer Glasses.

Acid-etched Glass

Glass etching comprises the techniques of creating art on the surface of any glass by applying acidic substances and colours as per the design requirement. It creates a distinctive, uniform, and smooth appearance. It makes glass translucent, providing filtered light and privacy with a silky feel. We have the best design team which can create any custom design that suits your taste and needs.

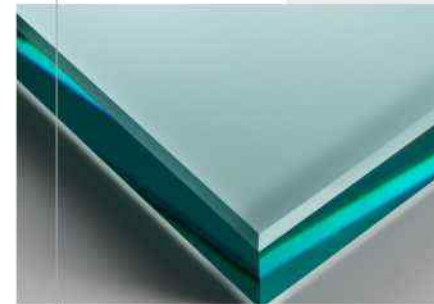

Bevelled Glass

Bevelled glass is usually made by taking thick glass and creating an angled surface cut around the entire periphery. Bevels act as prisms in sunlight, creating an interesting color diffraction which both highlights the glass work and provides a spectrum of colors which would ordinarily be absent in clear float glass.

Grinded Glass

We grind the edges of glass in various qualities according to different requirements (chamfering, rough grinding, polish grinding, pencil edge). We either grind the edges mechanically with the use of designated machines or by hand using the variety of hand tools.

Ceramic Printed Glass

Ceramic printed glass is produced when ceramic ink is applied as per required design and color to the glass through a fine mesh screen before the glass is tempered. This process makes the ink fuse in glass, thus making it permanent which cannot be damaged or removed by cleaning or scrubbing. These are used when it is important to mark a part or whole of glass for privacy or decorative purpose. They are majorly used in Glass facades, shower cubicals, Office Partitions, Furniture, etc.

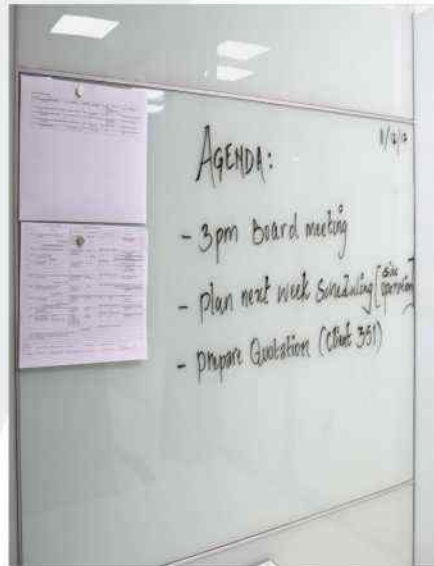

Stacked Glass

Stacked glass is a type of sculpture where strips of any glasses are cut in particular shape and then attached over each other by gluing. ... Edges of the individual pieces then treated to match exactly on the external side of your stacked glass paneling.

Magnetic Glass

Magnetic Boards are not only used for writing but it's added feature of posting important notes or documents by help of magnets makes it very useful. The look of a magnetic white-boards is one of the most appealing aspects but its strength and durability makes them worth every penny. It can last for long since they will never ghost or stain like a traditional whiteboard or pin boards. They are Very useful products for any classroom, office, workstations, hospitals, study rooms, conference room or office walls.

Integrated Blind Glass

The Venetian-style intergral blinds are installed between two glass sheets or an insulated glass. This System is perfect for controlling room temperature, glare of sun, privacy, protecting your furniture from fading and adding a stylish finishing touch to your room. It also eliminates the need of cleaning blinds again and again. Available in a wide range of designs and colours, they can be operated manually or electronically depending upon the chosen system. They are ideally suited for windows, partitions or skylights at homes, offices, hotels, hospitals, school etc.

Switchable Smart Glass

Switchable smart glass, as its name suggests, is operated by a simple electrical switch, controlling the opacity of the glass from clear to translucent. Switchable glass also offers thermal, solar and sound insulation benefits, helping to keep rooms cool, comfortable and quiet. Also, it removes the need for fiddly, awkward privacy blinds or curtains. They are now commonly used in Conference rooms, Directors or MD cabinets, Bathroom Partitions, Skylights, etc.

Glass Bricks/Blocks

Glass bricks are solid and hollow glass architectural products that allows light to pass through while providing a level of privacy. They help in creating a unique designer wall, which also gives sound and heat insulation. They are available in wide variety of colours, Sizes and designs. They are commonly used for Bathroom shower wall, Partition wall, Ceiling, Walkway, Commercial space separator, Counter Wall etc

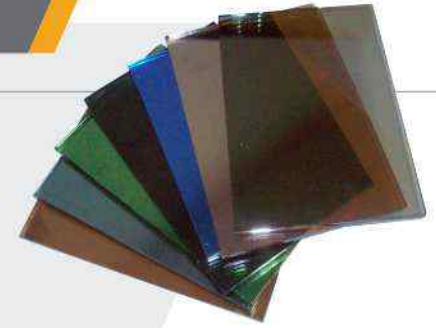

Clear Float Glass

Clear float glass is superior quality of flat glass having unique characteristics of excellent surface, uniform thickness, high optical clarity and bright appearance. It is widely used for window, glass self, furniture etc.

Tinted Glass

Tinted Glass is available in a number of tints which absorb a portion of the solar heat and block daylight. Tinting changes the color of the window and can increase visual privacy. Tinted glazings retain their transparency from the inside, although the brightness of the outward view is reduced and the color is changed. It is commonly used in window & Furniture.

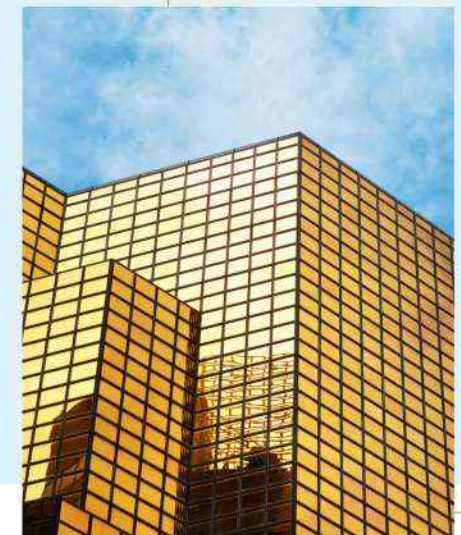

Extra Clear Glass & Mirror

Extra Clear Glass and mirrors are an exceptionally Clear due to low iron content than regular glasses. They are the best solutions when maximum light transmission, colour neutrality and high level of clarity are important concerns. It is widely used in bungalows, jewellery showrooms, Garments showrooms, museum and other Display cabinets.

Reflective Glass

Reflective glasses essentially an ordinary float glass with metallic coating that block the incoming heat radiation from sun while allowing the natural light, thus keeping the indoor spaces brighter and cooler. This special coating also provides a one way mirror effect preventing visibility from outside, hence maintaining privacy. They are available in wide variety of colours and specifications, which helps to create an eco friendly and energy efficient buildings. They are widely used in glazing of office building, hotel, mall, hospital etc.

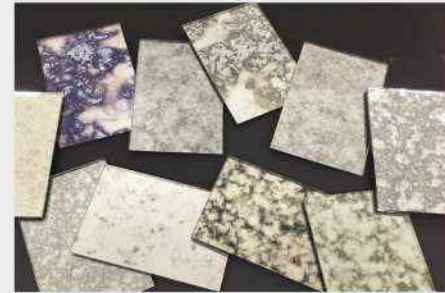

Decorative /LED Mirror

Hanging a mirror on your wall can add both depth and intrigue to your space. The right mirror to complement a place can go a long way in elevating the décor. Decorative Wall mirrors can be customized in so many different styles and materials that you're never short of choices. Explore our range, and find the perfect wall mirror for your hotel lobbies, Room or Bathroom walls, Changing rooms, Living Areas, Galleries, etc.

Antique Mirror

Antique mirror glass is a vintage style of mirror that often looks rusty or decaying. They're great for adding that homespun feel to an office, bar or restaurant and their versatility means they can be used as a feature piece on a wall, cut into tiles or even just as a more conventional mirror.

Lacquered Glass

Lacquered glass, coloured and opaque in appearance, is produced by depositing and then baking a coating of lacquer to one side of clear glass. It is available in infinite colours and is highly durable and scratch resistant. These glasses help to create unique and colourful space in your residence or offices areas like Kitchen, Ceilings, Lift lobbies, Wardrobes or cabinet shutters, writing

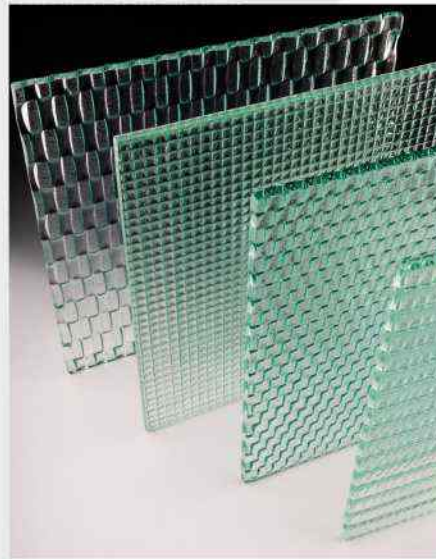

Colour / Tinted Mirror

Coloured mirrors are playing a major role these days in interiors by giving a very subtle but glossy look as per the theme of that place. These are in high demands for wall panelings in the area like lobbies, banquets, common areas and rooms of hotel, commercial and residential. available in various colours like Pink, Blue, green, Golden, Bronze, Copper, etc.

Patterned /Wired Glass

Patterned Glass also called as figured glass, is a decorative glass with pattern imprinted on one face of the glass. The light when passing through patterned glass diffuses due to the presence of patterns. These are available in many designs and colours. If additional security is required then wired glass can also be used.

Glass Hardware

Glass hardware are the unsung heroes of any building. They play a very important role in installations of glass doors, partitions, curtain walls, shower cubical, spider glazing, railing etc. Any wrong use of hardware or use of low quality hardware can be dangerous in future. We at Anand lamp have a wide range of best quality hardware and experienced engineers who can suggest you the best hardware as per your requirement.
